INDEX OF AUTHORS' NAMES.

TRANSACTIONS. 1891.

And also to such papers as appeared in the Proceedings during the Session 1890—1891 (Nos. 87—100, November, 1890, to July, 1891), but not in the Transactions (marked PROC.).

A.

Adie, R. H., a direct comparison of the physical constants involved in the determination of molecular weights by Raoult's method, PROC., **1891**, 26.

—— compounds of the oxides of phosphorus with sulphuric anhydride, 230.

—— osmotic pressure of salts in solution, 344.

Armstrong, H. E., terpenes and allied compounds: the nature of turpentine oils, including that obtained from *Pinus khasyana*, 311.

—— the formation of salts—a contribution to the theory of electrolysis and of the nature of chemical change in the case of non-electrolytes, PROC., **1891**, 118.

—— the function of chlorine in acid chlorides as exemplified by sulphuryl chloride, PROC., **1891**, 60.

Armstrong, H. E., and W. J. Pope, terpenes and allied compounds; sobrerol, a product of the oxidation of terebenthene (oil of turpentine) in sunlight, 315.

Armstrong, H. E., and E. C. Rossiter, a new method of preparing nitro-derivatives: the use of nitrogen dioxide as a nitrating agent, PROC., **1891**, 91.

—— —— bromo-derivatives of β-naphthol, PROC., **1891**, 87.

—— —— chloro- and bromo-derivatives of naphthol and naphthylamine, PROC., **1891**, 32.

—— —— the action of nitric acid on naphthol-derivatives as indicative of the manner in which nitration is effected in the case of benzenoïd compounds generally; the formation of nitro-keto-compounds, PROC., **1891**, 89.

Armstrong, H. E., and W. P. Wynne, studies on the constitution of tri-derivatives of naphthalene. No. 9. Andresen's naphthylaminedisulphonic acid, PROC., **1891**, 27.

B.

Bassett, H., eulyte and dyslyte (a correction), 978.

Bevan, E. J. See C. F. Cross.

Bishop, A. W., and W. H. Perkin, jun., the action of ethyl dichloracetate on the sodium derivative of ethyl malonate, PROC., **1891**, 41.

Brady, H. B., obituary notice of, 452.

Brauner, B., volumetric estimation of tellurium, 58, 238.

Burton, C. I., obituary notice of, 453.

C.

Cain, J. C., and J. B. Cohen, action of acetic acid on phenylthiocarbamide, 327.

Carnelley, T., obituary notice of, 455.

Carpenter, W. L., obituary notice of, 461.

Chapman, A. C., compounds of dextrose with the oxides of nickel, chromium, and iron, 323.

Cleve, P. T., the formation of an explosive substance from ether, PROC., **1891**, 15.

Cohen, J. B., dibenzanilide, 67.

Cohen, J. B. See also J. C. Cain.

Colefax, A., phenuvic acid: its constitution and relationship with Paal's phenylmethylfurfurancarboxylic acid, 190.

Collie, J. N., action of heat on ethyl β-amidocrotonate, 172.

Collie, J. N., constitution of dehydracetic acid, 179.
—— lactone of triacetic acid, 607.
—— reactions of dehydracetic acid, 617.
Cousins, H. H. See J. E. Marsh.
Cross, C. F., and E. J. Bevan, the action of nitric acid on the lignocelluloses, Proc., **1891**, 61.
Cundall, J. T., the dissociation of liquid nitrogen peroxide, 1076.

D.

Day, T. C., the influence of temperature on germinating barley, 664.
Dixon, A. E., new benzyl derivatives of thiocarbamide, 551.
Dufton, S. F., orthoquinolinehydrazine, 756.
Dufton, S. F. See also S. Ruhemann.
Dunstan, W. R., and T. S. Dymond, action of alkalis on the nitro-compounds of the paraffin series. Formation of isoxazoles, 410.
Dunstan, W. R., and W. H. Ince, aconite alkaloïds. Part I. Crystalline alkaloïd of *Aconitum napellus*, 271.
Dymond, T. S. See W. R. Dunstan.

E.

Easterfield, T. H., oxidation of mannitol by nitric acid. d.-Mannosaccharic acid, 306.
—— phenylbromacetic acid, an apparent exception to the Le Bel-Van't Hoff hypothesis, 71.

F.

Forster, M. O. See R. Meldola.
Frankland, P. F., and W. Frew, optically active glyceric acid, 96.
—— —— fermentation of calcium glycerate by *Bacillus ethaceticus*, 81.
Frankland, P. F., A. Stanley, and W. Frew, fermentations induced by the *Pneumococcus* of Friedländer, 253.
Frew, W. See P. F. Frankland.

G.

Gardner, J. A. See J. E. Marsh, F. Pullinger.
Gladstone, J. H., molecular refraction and dispersion of various substances, 290.
—— molecular refraction and dispersion of various substances in solution, 589.
Gordon, H., studies on the formation of substitution derivatives, Proc., **1891**, 62.
Green, A. G., and T. A. Lawson, the ortho- and para-nitro-derivatives of paratoluidine, 1013.

H.

Harrow, G., rapid method of estimating nitrates in potable waters, 320.
Hartley, W. N., spectra of blue and yellow chlorophyll, with some observations on leaf-green, 106.
Henderson, G. G., on diphenylisosuccinic acid and diphenylpropionic acid, 731.
Hewitt, J. T., chlorinated phenylhydrazines, 209.
—— citraconfluoresceïn, 303.
Heycock, C. T., and F. H. Neville, on the freezing points of triple alloys of gold, cadmium, and tin, 936.
Hodgkinson, W. R., and L. Limpach, a new method of preparing dinaphthylene oxide, $C_{20}H_{12}O$; and the constitution of its tetrasulphonic acid, 1096.
Hori, E., and H. F. Morley, normal and iso-propylparatoluidines, 33.
Hughes, F. See R. Meldola.
Hughes, R. E., the action of aluminium chloride on benzenoïd acid chlorides, Proc., **1891**, 70.
Huntly, G. N., action of phosphoryl chloride on phosphorus pentoxide, 202.
Hutcheson, J. B., obituary notice of, 463.

I.

Ince, W. H. See W. R. Dunstan.

J.

Japp, F. R., the gravivolumeter, an instrument by means of which the observed volume of any single gas gives directly the weight of the gas, 894.
Japp, F. R., and F. Klingemann, ethyl phenanthroxyleneacetoacetate, 1.

K.

Kipping, F. S., and J. E. Mackenzie, ethyl *aa'*-dimethyl-*aa'*-diacetylpimelate and its decomposition products, 569.

Kipping, F. S., and W. H. Perkin, jun., action of reducing agents on *aa'*-diacetylpentane: synthesis of dimethyldihydroxyheptamethylene, 214.

Klingemann, F., and W. F. Laycock, action of ammonia and of methylamine on the oxylepidens, 140.

Klingemann, F. See also F. R. Japp.

L.

Langer, C. See L. Mond.

Lawson, T. A. See A. G. Green.

Laycock, W. F. See F. Klingemann.

Limpach, L. See W. R. Hodgkinson.

M.

McGowan, G., iodometric estimation of nitric acid in nitrates, 530.

Mackenzie, J. E. See F. S. Kipping.

Marsh, J. E., and H. H. Cousins, the sulphonic derivatives of camphor, 966.

—— —— researches on the terpenes. II. On turpentine, 725.

—— —— researches on the terpenes. On camphene, 648.

Marshall, H., oxidation of cobalt salts by electrolysis, 760.

—— the persulphates, 771.

Marshall, T. R., and W. H. Perkin, jun., the synthetical formation of closed carbon chains. Part 9 (*cont.*). The action of ethylene bromide on the sodium compounds of ethyl acetoacetate and ethyl benzoylacetoacetate, 853.

Marshall, W. See T. Purdie.

Masson, O., and U. T. M. Wilsmore, does magnesium form compounds with hydrocarbon radicles?, PROC., **1891**, 16.

Matthews, F. E., the α- and β-modifications of benzene hexachloride, 165.

Meldola, R., and F. Hughes, azoderivatives of β-naphthylamine, 372.

Meldola, R., and M. O. Forster, researches on the triazine series, 678.

Millar, J. H. See J. J. Sudborough.

Mond, L., and C. Langer, iron carbonyls, 1090.

Mond, L., and F. Quincke, volatile compound of iron with carbonic oxide, 604.

Moody, G. T., combustion of magnesium in water vapour, PROC., **1891**, 20.

Morley, H. F. See E. Hori.

Morrell, R. S. See S. Ruhemann.

N.

Neville, F. H. See C. T. Heycock.

Nicholson, E. C., obituary notice of, 464.

O.

Ostwald, W., magnetic rotation, 198.

O'Sullivan, C., researches on the gums of the arabin group. Part II. Geddic acids, gedda gums, 1029.

O'Sullivan, C., and F. W. Tompson, estimation of cane sugar, 46.

P.

Perkin, A. G., action of nitric acid on anthracene, 634.

Perkin, F. M., derivatives of piperonyl, 150.

Perkin, W. H., the magnetic rotation of saline solutions, PROC., **1890**, 141.

—— the magnetic rotatory power of solutions of ammonium and sodium salts of some of the fatty acids, 981.

—— the refractive power of certain organic compounds at different temperatures, PROC., **1891**, 115.

Perkin, W. H., jun., acetylcarbinol, 786.

—— action of methylene iodide on the disodium compound of ethyl pentanetetracarboxylate. Synthesis of hexamethylene derivatives, 798.

—— formation of anthraquinone from orthobenzoylbenzoic acid, 1012.

Perkin, W. H., jun., and B. Prentice, new synthesis of the hexamethylenedicarboxylic acids, 990.

—— —— synthesis of homologues of pentanetetracarboxylic acid and of pimelic acid, 818.

Perkin, W. H., jun., and J. Stenhouse, benzoylacetic acid and some of its derivatives. Part V, 996.

Perkin, W. H., jun. See also A. W. Bishop, T. R. Marshall, F. S. Kipping.
Pickering, S. U., a recent criticism by Lupton of the conclusions drawn from a study of various properties of sulphuric acid solutions, PROC., **1891**, 105.
—— the nature of solutions as elucidated by a study of the densities, heat of dissolution, and freezing points of solutions of calcium chloride, PROC., **1891**, 105.
—— theory of dissociation into ions and its consequences, PROC., **1890**, 170.
Pope, W. J. See H. E. Armstrong.
Prentice, B. See W. H. Perkin, jun.
Pullinger, F., and J. A. Gardner, the vapour density of ammonium chloride, PROC., **1891**, 2.
Pullinger, W., volatile platinum compounds, 598.
Purdie, T., and W. Marshall, addition of the elements of alcohol to the ethereal salts of unsaturated acids, 468.

Q.

Quincke, F. See L. Mond.

R.

Reynolds, J. E., additive compounds of "thiocarbamide" which afford evidence of its constitution, 383.
Richardson, A., action of light on pure ether in presence of moist oxygen, 51.
—— decomposition of silver chloride by light, 536.
Rossiter, E. C. See H. E. Armstrong.
Ruhemann, S., and S. F. Dufton, mucic acid. Part IV. Action of phosphorus pentachloride on mucic acid, 26.
—— —— contributions to the knowledge of mucic acid, 750.
Ruhemann, S., and R. S. Morrell, action of ammonia on ethereal salts of organic acids, 743.

S.

Schryver, S. B., the asymmetry of nitrogen in substituted ammonium compounds, PROC., **1891**, 39.
Shields, J., preparation and properties of ethyl hydrogen fumarate and ethyl hydrogen maleate, 736.
Smith, H., obituary notice of, 465.
Sprague, C. T., ethyl thiacetoacetate, 329.
Stanley, A. See P. F. Frankland.
Stenhouse, J. See W. H. Perkin, jun.
Sudborough, J. J., action of nitrosyl chloride on metals, 655.
Sudborough, J. J., and J. H. Millar, action of heat on nitrosyl chloride, 73, 270.

T.

Thorpe, T. E., and A. E. Tutton, phosphorous oxide. Part II, 1019.
Tompson, F. W. See C. O'Sullivan.
Turpin, G. S., the action of picric chloride on amines in presence of alkali, 714.
Tutton, A. E., crystalline form of the calcium salt of the new optically active glyceric acid, 233.
—— crystallographical characters of aconitine from *Aconitum napellus*, 288.
Tutton, A. E. See also T. E. Thorpe.

V.

Vernon, H. M., a new modification of phosphorus, PROC., **1891**, 3.

W.

Warington, R., nitrification. Part IV, 484.
Werner, E. A., action of acetic anhydride on substituted thiocarbamides, and an improved method of preparing aromatic thiocarbamides, 396.
—— interaction of phenylthiocarbimide with acetic and propionic acids respectively, 544.
Will, H., obituary notice of, 466.
Wilsmore, U. T. M. See O. Masson.
Wynne, W. P. See H. E. Armstrong.

Y.

Young, S., dibenzylketone, 621.

Young, S., molecular volumes of the saturated vapours of benzene and of its halogen derivatives, 125.
—— new method of determining the specific volumes of liquids and of their saturated vapours, 37.
—— on the vapour pressures and molecular volumes of acetic acid, 903.
Young, S., on the vapour pressures and molecular volumes of carbon tetrachloride and of stannic chloride, 911.
—— vapour pressures of dibenzyl ketone, 626.
—— vapour pressures of mercury, 629.

INDEX OF SUBJECTS.

TRANSACTIONS. 1891.

And also to such papers as appeared in the Proceedings during the Session 1890—1891 (Nos. 87—100, November, 1890, to July, 1891), but not in the Transactions (marked PROC.).

A.

Acetic acid, vapour pressures and molecular volumes of, 903.
Acetone, chlor-, action of ethyl benzoylsodacetate on, 191,
Acetonephenanthraquinone, condensation of, 105.
Acetopropyl alcohol, oxime of, and its anhydride, 866.
Acetylbenzylthiocarbamide, 408, 562.
Acetylcarbinol, 786, 790.
—— osazone of, 795.
—— preparation of, from monochloracetone, 794.
—— reduction of, 796.
Acetylcarbinyl acetate, 788.
Acetyldibenzylthiocarbamide, 406.
Acetylene bromide, molecular refraction and dispersion of, 295.
Acetyltrimethylene, action of hydrogen bromide on, 876.
—— hydrolysis of, 876.
—— reduction of 874.
Acetyltrimethylenecarboxylic acid, oxime of, 867.
—— —— preparation of, 863.
—— —— reduction of, 870.
Acetyltrimethyleneoxime, 865.
Acids, organic, action of ammonia on the ethereal salts of, 743.
—— unsaturated, addition of the elements of alcohol to the ethereal salts of, 468.
Aconine, 286.
Aconitine aurochloride, 278.
—— crystalline, properties of 276.
—— crystallographical characters of, 288.
—— effect of heat on, 282.
—— gold chloride, 279.
—— specific rotation of, 281.
Aconitum napellus, crystalline alkaloïd of, 271.
Alcohol, estimation of, by oxidation with potassium dichromate and sulphuric acid, 93.
Alkaloïd, crystalline, of *Aconitum napellus*, 271.
Alloys, triple, of gold, cadmium, and tin, freezing points of, 936.
Allyl tribromide, molecular refraction and dispersion of, 295.
Allylacetic acid, molecular refraction and dispersion of, 295.
Allylanisoïl, ortho-, molecular refraction and dispersion of, 295.
Allylbenzylthiocarbamide, 559.
Aluminium, action of nitrosyl chloride on, 659.
—— salts, molecular refraction and dispersion of, in solution, 595.
Amines, action of picric chloride on, in presence of alkali, 714.
Ammonia, action of picric chloride on, 715.
—— molecular refraction and dispersion of, in solution, 595.
Ammonium acetate, magnetic rotatory power of solutions of, 984.
—— chloride, vapour density of, 1407, PROC., **1891**, 2.
—— formate, magnetic rotatory power of solutions of, 982.
—— nitroethane, 412.
—— persulphate, 777.
—— propionate, magnetic rotatory power of solutions of, 985.
—— salts, molecular refraction and dispersion of, in solution, 595.
—— compounds, substituted, asymmetry of nitrogen in, PROC., **1891**, 39.
Amyl formate, molecular refraction and dispersion of, 295.

Amylene, molecular refraction and dispersion of, 295.
Anhydroacetonephenanthraquinone, 105.
Anhydroaconitine, formation and properties of, 283.
—— gold chloride, 285.
Aniline, action of picric chloride on, 715.
Anniversary meeting, 435.
Anthracene, action of nitric acid on, 634.
—— ethyl nitrate, 643.
—— —— —— action of hydrogen iodide on, 647.
—— methyl nitrate, 648.
Anthraquinone, formation of, from orthobenzoylbenzoic acid, 1012.
Anthrone, nitroso-, action of nitric acid on, 641.
—— nitrosonitro-, 639.
—— —— action of sodium sulphide on, 640.
—— pseudonitroso-, 645.
Antimony, action of nitrosyl chloride on, 661.
Apoaconitine, formation and properties of, 283.
Arabinantrigalactangeddic acid, 1039.
Arabin group, gums of the, 1029.
Arsenic, action of nitrosyl chloride on, 662.
Australene, change of rotation of, 727.
—— hydrochloride, 728.
Azo-derivatives of β-naphthylamine, 372.
Azo-orthotoluidine, ortho-, 1016.
Azoxyorthotoluidine, para-, 1016.

B.

Bacillus ethaceticus, fermentation of calcium glycerate by, 81.
—— *frugi*, 501.
Balance Sheet of the Chemical Society from March 20, 1890, till March 19, 1891, 448.
—— —— of the Research Fund from March 20, 1890, till March 11, 1891, 449.
Barium persulphate, 779.
—— salts, molecular refraction and dispersion of, in solution, 595.
Barley, germinating, influence of temperature on, 664.
Benzaldehyde, action of, on phenylthiocarbimide, 67.
Benzene and its halogen derivatives, molecular volumes of the saturated vapours of, 125.
Benzene, effect of temperature on the refraction and dispersion of, 291.
—— hexachloride, α- and β-modifications of, 165.
—— molecular refraction and dispersion of, 295.
—— specific volume of, 44.
Benzeneazo-β-naphthylamine, action of aldehydes on, 380.
—— action of nitric acid on, 379.
—— orthonitro-, 373.
Benzeneazo-β-naphthylamines, nitro-, acetyl derivatives of, 375.
—— —— formation of pseudazimides from, 378.
Benzenoïd acid chlorides, action of aluminium chloride on, Proc., **1891**, 70.
—— derivatives, nitration of, Proc., **1891**, 89.
Benzoylacetic acid and its derivatives, 996.
Benzoylbenzoic acid, anthraquinone from, 1012.
Benzoylphenylhydrazine, Proc., **1891**, 42.
Benzoylpropyl alcohol, 886.
—— —— oxime of, 888.
Benzoyltrimethylene, reduction of, 885.
Benzoyltrimethylenecarboxylic acid, oxime of, 883.
—— —— reduction of, 884.
Benzoyltriphenylpropiomethylamide, 147.
—— distillation of, 148.
Benzylacetophenone, 1007.
—— oxime of, 1008.
—— reduction of, 1008.
Benzylammonium thiocyanate, 553.
Benzylaniline, molecular refraction and dispersion of, 296.
Benzylethylphenylthiocarbamide, 564.
Benzylmetatolylthiocarbamide, 556.
Benzylmetaxylylthiocarbamide, 557.
Benzylmethylphenylthiocarbamide, 562.
Benzyl-α-naphthylthiocarbamide, 558.
Benzyl-β-naphthylthiocarbamide, 559.
Benzylorthotolylthiocarbamide, 555.
Benzylparatolylthiocarbamide, 557.
Benzylphenylbenzylthiocarbamide, 567.
Benzylpimelic acid, attempt to prepare, 847.
Benzylpiperidylthiocarbamide, 568.
Benzylpropylene-ψ-thiocarbamide, 560.
Benzylthiocarbamide, 552.
Benzylthiocarbimide, preparation of, 407, 552.
Bismuth, action of nitrosyl chloride on, 662.
—— effect of various metals on the freezing point of, Proc., **1891**, 159.

Bisparatolylmethylpyrazolone, 341.
Bisphenylmethylpyrazolone, 339.
Boyle's law applied to salts in solution, 351.
Bromoform, molecular refraction and dispersion of, 295.
Butenylanisoils, para-, molecular refraction and dispersion of, 295.
Butenylbenzene, β-, molecular refraction and dispersion of, 295.
Bye-laws, alteration in, 451.

C.

Cadmium, action of nitrosyl chloride on, 657.
—— effect of various metals on the freezing point of, PROC., **1890**, 159.
—— gold and tin, freezing point of triple alloys of, 936.
Calcium chloride, densities of solutions of, PROC., **1891**, 105.
—— —— freezing points of solutions of, PROC., **1891**, 105.
—— —— heat of dissolution of, PROC., **1891**, 105.
—— glycerate (active), crystalline form of, 253.
—— —— fermentation of, by the *Bacillus ethaceticus*, 81.
—— salts, magnetic rotation of, PROC., **1890**, 142.
—— —— molecular refraction and dispersion of, in solution, 595.
Camphene, action of phosphoric chloride on, 652.
—— oxidation of, 649.
—— preparation of, 648.
Camphoic acid, 649.
Camphopyric acid, 650.
—— anhydride, 650.
Camphor and its derivatives, molecular refraction and dispersion of, in solution, 591.
—— sulphonic derivatives of, 966.
Camphore, bromo-, preparation of, 968.
—— chloro-, preparation of, 976.
Camphorsulphonic acid, α-bromo-, and its salts, 971,
—— —— β-bromo-, salts of, 975.
—— —— α-chloro-, salts of, 977.
—— —— β-chloro-, derivatives of, 978.
—— chloride, α-bromo-, 974.
—— —— α-chloro-, 978.
Carbon bisulphide, effect of temperature on the refraction and dispersion of, 291.
—— dichloride, molecular refraction and dispersion of, 295.
Carbon, tetrachloride, molecular refraction and dispersion of, 295.
—— —— specific volume of, 43, 45.
—— —— vapour pressures and molecular volumes of, 911.
Carbon chains, closed, synthetical formation of, 853.
Carbonic anhydride, influence of temperature on the production of, by germinating barley, 664.
Carbonic oxide, compounds of, with iron, 1090.
—— —— volatile compound of iron with, 604.
Carbonyl bromoplatinite, 603.
—— chloroplatinites, 598.
Cedrene, molecular refraction and dispersion of, 295.
Cerium chloride, molecular refraction and dispersion of, in solution, 595.
Chloric acid, molecular refraction and dispersion of, in solution, 593.
Chlorine, function of, in acid chlorides, as exemplified by sulphuryl chloride, PROC., **1891**, 60.
—— water, influence of hydrochloric acid on the decomposition of, by light, 539.
Chloroform, molecular refraction and dispersion of, 295.
Chlorophyll, blue and yellow, separation of, 109.
—— —— —— spectra of 106.
—— spectra, comparison of, 113.
Chromium dextrosate, 324.
—— sulphate, molecular refraction and dispersion of, in solution, 595.
Cinchonine mucate, 754.
Cinnamene, molecular refraction and dispersion of, 295.
Cinnamic chloride, action of aluminium chloride on, PROC., **1891**, 71.
Citraconfluorescein, 301.
Cobalt salts, oxidation of, by electrolysis, 760.
Cobaltic ammonium oxalate, 769.
—— nitrate, 770.
—— sulphate, 768.
Copper, action of nitrosyl chloride on, 658.

D.

Dehydracetic acid, action of sulphuric acid on, 609.
—— —— constitution of, 179.
—— —— preparation and properties of, 618.
—— —— reactions of, 617.
Dehydracetonephenanthraquinone, 105.

Dextrose, compounds of, with the oxides of nickel, chromium, and iron, 323.
Dextrosobrerol, 317.
Dextroterebenthene, 313.
Diacetylpentane, $\alpha\alpha'$-, action of reducing agents on, 214.
Diallylacetic acid, molecular refraction and dispersion of, 295.
Diamylene, molecular refraction and dispersion of, 295.
Diarabinantrigalactangeddic acid, 1038.
Dibenzalpimelic acid, 850.
Dibenzanilide, 67.
Dibenzoylacetic acid, action of hydroxylamine on, 1004.
—— —— reduction of, 1001.
Dibenzoylstilbene, action of alcoholic ammonia on, 142.
—— action of methylamine on, 146.
Dibenzoylstilbenimide, 144.
Dibenzyl ketone, 621.
—— —— vapour pressures of, 626.
—— molecular refraction and dispertion of, in solution, 591.
Dibenzylpentanetetracarboxylic acid, 844.
Dibenzylpimelic acid, 846.
Dibenzylthiocarbamide, action of acetic anhydride on, 40.
Didymium salts, molecular refraction and dispersion of, in solution, 595.
Diethylamine, molecular refraction and dispersion of, 295.
Diethylammonium bromide, compound of thiocarbamide with, 389.
Diethylpentanetetracarboxylic acid, 833.
Diethylpimelic acid, 835.
Diethylthiocarbamide, action of acetic anhydride on, 409.
Diferroheptacarbonyl, 1092.
Digalactangeddic acid, 1057.
Dihydroxybenzoylacetic acid, PROC., **1891**, 43.
Dihydroxydibenzylacetic acid, 1001.
Diisobutylpimelic acid, 843.
Diisopropylpimelic acid, 840.
Dimethyl dipropyl glycol, 875.
Dimethylacetylcaproic acid, $\alpha\alpha'$-, 570, 584.
Dimethyldiacetylpentane, $\alpha\alpha'$-, 570, 587.
—— dioxime of, 588.
Dimethyldibromoheptamethylene, 223.
Dimethyldihydroxyheptamethylene, action of hydroxylamine on, 221
—— action of phenylhydrazine on, 221.
—— condensation product of, 228.
—— constitution of, 221.
—— preparation of, 217.
—— sodium derivative of, 220.
—— synthesis of, 214.
Dimethylheptamethylene, 227.
—— diacetate, 225.
—— glycol, 217.
Dimethylhydroxyiodoheptamethylene, 224.
Dimethyloximidocaproic acid, 586.
Dimethylpentanetetracarboxylic acid, 830.
Dimethylpimelic acid, $\alpha\alpha'$-, 570, 577, 587, 832.
Dimethylpyridine, $\alpha\alpha'$-, 177.
—— oxidation of, 178.
Dimethylpyridone, $\alpha\alpha'$-, 177.
Dinaphthylene oxide, β-, new method of preparation of, 1096.
—— —— nitro-, 1100.
—— —— tetrabromo-, 1100.
—— —— tetranitro-, 1100.
Dinaphthylene-oxide-tetrasulphonic acid, constitution of, 1099.
Diphenylamine, action of picric chloride on, 716.
Diphenylisosuccinic acid, 731.
—— —— preparation of, 732.
Diphenylmethane, bromo-, preparation of, 731.
Diphenylnaphthotriazine, and its derivatives, 681.
Diphenyl-4 : 5-phenylpyrrholidone, 3-, 146.
Diphenyl-4 : 5-phenylpyrrholone, 3-, 144.
Diphenylpropionic acid, β-, 731.
—— —— —— preparation of, 734.
Diphenylpropyl alcohol, 1009.
Diphenylthiocarbamide, action of acetic acid on, 329.
—— action of water on, 328.
—— symmetrical, action of acetic anhydride on, 396.
Dipropylamine, molecular refraction and dispersion of, 296.
Dipropylpimelic acid, 838.
Dispersion, molecular, of various substances in solution, 589.
—— of various carbon compounds, 290.
Dispersive power of organic compounds, 290.
Dissociation into ions, theory of, and its consequences, PROC., **1890**, 170.
—— of liquid nitrogen peroxide, 1076.
Ditolylthiocarbamide, meta-, action of acetic anhydride on, 403.
—— ortho-, action of acetic anhydride on, 402.
Dixylylthiocarbamide, meta-, action of acetic anhydride on, 404.
Dyslyte, 978.

E.

Electrolysis, oxidation of cobalt salts by, 760.
—— theory of, PROC., **1891**, 118.
Ethane, nitro-, action of alkali carbonates and hydroxides on, 411.
—— —— action of ammonia on, 412.
Ether, action of light on, in presence of moist oxygen, 51.
—— formation of an explosive substance from, PROC., **1891**, 15.
—— influence of temperature on the formation of hydrogen peroxide from, 56.
Ethyl acetyltetramethylenecarboxylate, molecular refraction and dispersion of, 295.
—— acetyltrimethylenecarboxylate, action of isoamyl iodide and sodium ethoxide on, 892.
—— —— molecular refraction and dispersion of, 295.
—— acrylate, action of ethyl alcohol on, 475.
—— allylacetate, action of alcoholic sodium ethoxide on, 482.
—— allylmethylbenzoylacetate, 999.
—— amidocrotonate, action of heat on, 172.
—— amidoethylenedicarboxylate, 747.
—— angelate, action of alcoholic sodium ethoxide on, 482.
—— benzoylacetate, condensation of, with furfuraldehyde, 1011.
—— benzoylsodacetate and chloracetone, reaction between, 191.
—— benzylbenzoylacetate, 1006.
—— benzyldicarboxyglutaconate, action of ammonia on, 748.
—— bromide, molecular refraction and dispersion of, 295.
—— carbamate, action of parachlorophenylhydrazine on, 211.
—— chlorofumarate, molecular refraction and dispersion of, 295.
—— chlorophenylhydrazinepyruvate (ortho-), 211.
—— crotonate, action of ethyl alcohol on, 478.
—— dibenzoylacetate, action of phenylhydrazine on, 1005.
—— —— preparation and properties of, 1000.
—— dibenzoylmethylacetate, 1005.
—— dibenzylpentanetetracarboxylate, 843.
—— dibromhydromuconate, 752.
—— dibromopentanetetracarboxylate, 827.
Ethyl dicarboxyglutaconate, action of ammonia on, 745.
—— dichloracetate, action of, on the sodium derivative of ethyl malonate, PROC., **1891**, 41.
—— diethylpentanetetracarboxylate, 833.
—— diethylpimelate, 834.
—— diisobutylpentanetetracarboxylate, 841.
—— diisobutylpimelate, 842.
—— diisopropylpentanetetracarboxylate, 839.
—— diisopropylpimelate, 840.
—— *αα'*-dimethyl-*αα'*-diacetylpimelate, and its decomposition products, 569.
—— —— dihydrazone of, 573.
—— —— hydrolysis of, 580.
—— —— preparation of, 571.
—— dimethylpentanetetracarboxylate, 829.
—— *αα'*-dimethylpimelate, 571, 575, 831.
—— diphenylisosuccinate, preparation of, 731.
—— diphenylpropionate, 735.
—— dipropylpentanetetracarboxylate, 836.
—— dipropylpimelate, 837.
—— disodiopentanetetracarboxylate, action of benzyl chloride on, 850.
—— —— action of methylene iodide on, 798.
—— —— action of trimethylene bromide on, 994.
—— ethylenetricarboxylate, *α*-, PROC., **1891**, 41.
—— fumarate, molecular refraction and dispersion of, 295.
—— furfuralbenzoylacetate, 1011.
—— glutaconate, action of ammonia on, 745.
—— hexamethylenetetracarboxylate [1 : 1 : 3 : 3], 803.
—— hydrogen fumarate, preparation and properties of, 736.
—— —— maleate, preparation and properties of, 740.
—— iodide, action of, on magnesium, PROC., **1891**, 17.
—— —— molecular refraction and dispersion of, 295.
—— isophenanthroxyleneacetoacetate, 2, 5.
—— —— action of acetic anhydride on, 7.
—— —— action of bromine on, 8.
—— —— action of phenylhydrazine on, 7.
—— —— hydrolysis of, with caustic alkalis, 11.

Ethyl isophenanthroxyleneacetoacetate, reduction of, with hydriodic acid, 10.
—— —— reduction of, with zinc and hydrochloric acid, 8.
—— lutidonecarboxylate, 174.
—— maleate, molecular refraction and dispersion of, 295.
—— malonate, action of ethyl dichloracetate on the sodium derivative of, PROC., **1891**, 41.
—— methacrylate, action of alcoholic sodium ethoxide on, 481.
—— methyldibenzoylacetate, PROC., **1891**, 43.
—— nitropiperonylacrylate, 156.
—— pentanetetracarboxylate, preparation of, 822.
—— —— sodium derivative of, PROC., **1891**, 43.
—— —— synthesis with the aid of, PROC., **1891**, 43.
—— phenanthroxyleneacetoacetate, 1.
—— —— action of acetic acid on, 14.
—— —— action of alcoholic hydrogen chloride on, 22.
—— —— action of alcoholic potash on, 24.
—— —— action of ammonia on, 25.
—— —— action of formic acid on, 3.
—— —— action of propionic acid on, 17.
—— —— action of sulphuric acid and alcohol on, 18.
—— α-phenanthroxyleneisocrotonate, 2.
—— pimelate, preparation of, 825.
—— propanetetracarboxylate, preparation of, 991.
—— propanetricarboxylate, β-, PROC., **1891**, 41.
—— sodacetoacetate, action of ethylene bromide on, 853.
—— sodethylacetoacetate, action of ethylene bromide on, 893.
—— sodiobenzylacetate, action of ethylene bromide on, 853.
—— tetrabromadipate, 753.
—— thiacetoacetate, 329.
—— —— action of phenylhydrazine on, 332.
—— —— condensation of, with paratolylhydrazine, 339.
—— —— preparation of, 331.
—— thiocyanate, molecular refraction and dispersion of, 296.
Ethylamidopiperonyl-ω-carboxylic anhydride, 158.
Ethyl benzylbenzoylacetate, hydrolysis of, 1007.
Ethylbenzylphenylthiocarbamide, 565.
Ethylene bromide, molecular refraction and dispersion of, 295.
Ethyl-β-phenylhydroxypropionic acid, α-, 1009.
Ethyl-β-phenyllactic acid, α-, PROC., **1891**, 43.
Ethylthiocarbimide, molecular refraction and dispersion of, 296.
Eulyte, 978.
Explosion occasioned by impurities in commercial ether, PROC, **1891**, 15.

F.

Fermentation of calcium glycerate by the *Bacillus ethaceticus*, 81.
Fermentations induced by the *Pneumococcus* of Friedländer, 253.
Ferric chloride, molecular refraction and dispersion of, in solution, 595.
—— dextrosate, 325.
Ferropentacarbonyl, 1091.
Formylparachlorophenylhydrazine, 213.
Freezing point of triple alloys of gold, cadmium, and tin, 936.
Fumaric chloride, chloro-, molecular refraction and dispersion of, 295.

G.

Galactangeddic acid, 1057.
Gas, determination of the weight of, from the volume, 894.
Gedda gum, proteïd from, 1061.
—— gums, 1029.
Geddic acids, 1029.
Geddinosic acid, 1041.
Geddinosic acid, β-, 1054.
Germinating barley, influence of temperature on, 664.
Glucose, fermentation of, with Friedländer's *Pneumococcus*, 254.
Glutaric acid, preparation of, 993.
Glyceric acid, an optically active, 96.
—— —— optically active, crystalline form of the calcium salt of, 233.
Glycerol, molecular refraction and dispersion of, 295.
Gold, action of nitrosyl chloride on, 662.
—— cadmium and tin, freezing point of triple alloys of, 936.
Gravivolumeter, 894.
Gums, gedda, 1029.
——of the arabin group, 1029.

H.

Haloïd compounds, magnetic rotation of, PROC., **1890**, 142.

Heptane, molecular refraction and dispersion of, 295.
Heptarabinanpentagalactangeddic acid, 1074.
Heptarabinantetragalactangeddic acid, 1071.
Heptarabinantrigalactangeddic acid, 1065.
Hexamethylene derivatives, synthesis of, 798.
Hexamethylenedicarboxylic acids, new synthesis of, 990.
—— anhydride, Γ^{cis}-, 812.
Hexamethylenemetadicarboxylic acid, Γ^{cis}-, 808.
—— —— $\Gamma^{cistrans}$, 814.
—— acids, conversion of one into the other form of, 813, 816, 817.
Hexamethylenetetracarboxylic acid [1 : 1 : 3 : 3], 804.
—— —— formation of, 994.
Hexarabinanpentagalactangeddic acid, 1074.
Hexarabinantrigalactangeddic acid, 1065.
Hydriodic acid, molecular refraction and dispersion of, in solution, 593.
Hydrobromic acid, molecular refraction and dispersion of, in solution, 593.
Hydrochloric acid, molecular refraction and dispersion of, in solution, 593.
Hydrocinnamanilide, Proc., **1891**, 71.
Hydrocinnamic chloride, Proc., **1891**, 71.
—— —— action of aluminium chloride on, Proc., **1891**, 71.
Hydrocinnamide, Proc., **1891**, 71.
Hydrogen peroxide, influence of temperature on the formation of, from ether, 56.
Hydroxides of the alkali metals, magnetic rotation of, Proc., **1890**, 143.
Hydroxybenzyltrimethylenecarboxylic acid, 884.
Hydroxyethyltrimethylenecarboxylic acid, 870.
Hydroxyhydromuconic acid, bromo-, lactone of, 753.

I.

Invertase, preservation of, 47.
Iodic acid, molecular refraction and dispersion of, in solution, 591.
Iridium chloride, molecular refraction and dispersion of, in solution, 595.
Iron, action of nitrosyl chloride on, 660.
—— carbonic oxide, 604, 1090.
—— carbonyls, 604, 1090.
Iron, volatile compounds of carbonic oxide with, 604, 1090.
Isoamyl oxide, molecular refraction and dispersion of, 295.
Isobutyl iodide, molecular refraction and dispersion of, 295.
Isocamphopyric acid, 651.
Isophenanthroxyleneacetic acid, action of acetic anhydride on, 13.
Isophenanthroxyleneacetoacetic acid, 11.
—— —— action of potash on, 12.
Isopropylparatoluidine, 34.
Isopropylparatolylnitrosamine, 34.
Isoxazoles, formation of, 410.

L.

Lævosobrerol, 317.
Lævoterebenthene, 313.
Lanthanum salts, molecular refraction and dispersion of, in solution, 595.
Lead acetate, molecular refraction and dispersion of, in solution, 595.
—— action of nitrosyl chloride on, 658.
—— and silver oxides, compounds of, 1093.
—— effect of various metals on the freezing point of, Proc., **1890**, 160.
—— persulphate, 782.
Leaf-green, observations on, 106.
Lecture experiment: Combustion of magnesium in water vapour, Proc., **1891**, 20.
Light, action of, on phosphorous oxide, 1019.
—— action of, on pure ether in presence of moist oxygen, 51.
—— action of, on silver chloride, 536.
—— decomposition of silver chloride by, 536.
—— influence of hydrochloric acid on the decomposition of chlorine-water by, 539.
Ligno-celluloses, action of nitric acid on Proc., **1891**, 61.
Liquids, new method of determining the specific volume of, 37.
Lithium salts, magnetic rotation of, Proc., **1890**, 142.
—— —— molecular refraction and dispersion of, in solution, 595.
Lutidine, 177.
Lutidonecarboxylic acid, 176.

M.

Magnesium, action of nitrosyl chloride on, 656.
—— combustion of, in water vapour, Proc., **1891**, 20.

Magnesium, compounds of, with hydrocarbon radicles, experiments on the existence of, PROC., **1891**, 16.
—— ethyl, attempts to prepare, PROC., **1891**, 17.
—— salts, magnetic rotation of, PROC., **1890**, 142.
—— —— molecular refraction and dispersion of, in solution, 595.
Magnetic rotation, 198.
—— —— of saline solutions, PROC., **1890**, 141.
—— rotatory power of solutions of ammonium and sodium salts of some fatty acids, 981.
Manganese, action of nitrosyl chloride on, 660.
Mannitol, fermentation of, with Friedländer's *Pneumococcus*, 256.
—— molecular refraction and dispersion of, in solution, 591.
—— oxidation of, by nitric acid, 306.
Mannosaccharic acid, d-, 306.
Menthol, molecular refraction and dispersion of, in solution, 591.
Mercury, action of nitrosyl chloride on, 659.
—— vapour pressures of, 629.
Metals, action of nitrosyl chloride on, 655.
—— molecular condition of, when alloyed with each other, PROC., **1890**, 158.
Metaphosphoric acid, molecular refraction and dispersion of, in solution, 593.
Methane, nitro-, action of alkalis on, 430.
Methoxyphenyl-*ald*-phenylnaphthotriazine, *az*-ortho-, 697.
Methoxysuccinamide, 470.
Methoxysuccinic acid, 471.
Methyl acrylate, action of methyl alcohol on, 474.
—— crotonate, action of methyl alcohol on, 476.
—— fumarate, action of sodium methoxide and methyl alcohol on, 468.
—— —— action of sodium methoxide on, 472.
—— hexamethylenemetadicarboxylate, 806.
—— iodide, molecular refraction and dispersion of, 295.
—— methoxysuccinate, 468.
—— nitropiperonylacrylate, 156.
—— sulphate, molecular refraction and dispersion of, 296.
Methylammonium salts, compounds of, with thiocarbamide, 392.
Methylaniline, action of picric chloride on, 716.
Methyldehydropentone, 880.
—— action of water on, 881.
Methyldehydropentonecarboxylic acid, 878.
Methyldiphenylamine, molecular refraction and dispersion of, 296.
Methyl-3-diphenyl-4 : 5-phenylpyrrholone, 149.
Methylene diiodide, molecular refraction and dispersion of, 295.
Methylglycol, formation of, from acetylcarbinol, 796.
Methyl-β-phenyllactic acid, α-, PROC., **1891**, 43.
Methylpropylcarbinol, formation of, 874.
Molecular refraction of carbon compounds, 290.
—— volumes of acetic acid, 903.
—— —— of carbon tetrachloride and stannic chloride, 911.
—— —— of the saturated vapours of benzene and its halogen derivatives, 125.
—— weights, direct comparison of the physical constants involved in the determination of, by Raoult's method, PROC., **1891**, 26.
—— —— of metals in solution, PROC., **1890**, 159.
Mucic acid, 750.
—— —— action of phosphorus pentachloride on, 26.
—— —— constitution of, 753.
Muconic acid, 750.
—— —— action of bromine on, 750.

N.

Naphthalene, constitution of the tri-derivatives of, PROC., **1891**, 27.
Naphthol, β-, bromo-derivatives of PROC., **189**, 87.
—— 1 : 3-bromochloro-β-, PROC., **1891**, 33.
—— di- and tri-chloro-β-, PROC., **1891**, 32, 33.
—— 1 : 3-dibromo-β-, PROC., **1891**, 33.
—— tetrabromo-β-, PROC., **1891**, 88.
—— tribromo-β-, PROC., **1891**, 87.
Naphthol-derivatives, nitration of, PROC., **1891**, 89.
Naphthols, chloro- and bromo-, action of nitric acid and oxidising agents on, PROC., **1891**, 34.
Naphthylamine, α-, action of picric chloride on, 716.
Naphthylamine, β-, azo-derivatives of, 372.
—— chloro- and bromo-derivatives of, PROC., **1891**, 32.

Naphthylaminedisulphonic acid, β-, Andresen's, PROC., **1891**, 27.
Nickel action of nitrosyl chloride on, 660.
—— dextrosate, 323.
Nitrates, estimation of, in potable waters, 320.
—— iodometric estimation of nitric acid in, 530.
—— magnetic rotation of, PROC., **1890**, 144.
—— production of, in nitrification, 514.
Nitration of benzenoïd derivatives, PROC., **1891**, 89.
—— with nitric peroxide, PROC., **1891**, 91.
Nitric acid, iodometric estimation of, in nitrates, 530.
—— —— molecular refraction and dispersion in solution, 593.
—— organism, behaviour of, with ammonia, 521.
—— —— nutrition of, 519.
Nitrification, 484.
—— a purely nitrous agent of, 486.
—— conditions which determine the formation or separation of a nitrous agent only, 490.
—— distinction between the production of nitrites and nitrates in, 485.
—— isolation of the nitrous organism of, 495.
—— nutrition of the nitric organism of, 519.
—— nutrition of the nitrous organism of, 509.
—— production of nitrates in, 514.
—— theory of, 523.
Nitrites, production of, in nitrification, 486.
Nitro-compounds of the paraffin series, action of alkalis on, 410.
Nitro-derivatives, new method of preparing, PROC., **1891**, 91.
Nitrogen peroxide, liquid, dissociation of, 1076.
—— —— preparation of, 1077.
—— —— use of, as a nitrating agent, PROC., **1891**, 91.
Nitro-keto-compounds, formation of, PROC., **1891**, 89.
Nitrosyl chloride, action of heat on, 271.
—— —— action of, on metals, 655.
Nitrous organism of nitrification, isolation of 495.
—— —— —— description of, 507.
—— —— —— nutrition of, 509.
—— —— —— properties of, 505.
Nonarabinatetragalactangeddic acid, 1071.
Non-electrolytes, nature of chemical change in, PROC., **1891**, 118.

O.

Obituary notices, 452.
Oil of turpentine, oxidation of, in sunlight, 311, 315.
Osmotic pressure of salts in solution, 344.
Oxylepidens, action of ammonia and methylamine on, 140.

P.

Pentane, molecular refraction and dispersion of, 295.
Pentanetetracarboxylic acid, preparation and properties of, 824.
—— —— synthesis of homologues of, 818.
Pentarabinantetragalactangeddic acid, 1070.
Perchloric acid, molecular refraction and dispersion of, in solution, 593.
Persulphates, 771.
Phenazoxime, dinitro-, 723.
Phenol, chlorination and bromination of, PROC., **1891**, 64.
—— diorthonitro-, action of bromine on, PROC., **1891**, 63.
—— parabromodiorthonitro-, isomeric change of, PROC., **1891**, 63.
—— parachlorodiorthonitro-, PROC., **1891**, 63.
Phenolorthosulphonic acid, orthoparadichloro-, action of sulphuric acid on, PROC., **1891**, 64.
Phenols, amido-, action of picric chloride on, 718.
—— nitro-, sulphonation of, PROC., **1891**, 65.
Phenuvic acid, 190.
—— —— constitution of, 194.
—— —— relationship with Paal's phenylmethylfurfurancarboxylic acid, 190.
Phenyl ether, molecular refraction and dispersion of, in solution, 591.
—— phenylsemithiocarbazide, parachloro-, 212.
Phenylbromacetic acid, an apparent exception to the Le Bel-Van't Hoff hypothesis, 71.
Phenylcarbamide, diparachloro-, 212.
Phenyldehydropentone, 886.
Phenylhydrazine hydrochloride, orthochloro-, 209.
—— orthochloro-, 209.
—— parabanate, parachloro-, 213.
—— parachloro-, 211.
—— —— action of chloroform and alcoholic potash on, 213.
Phenylhydrazinepyruvic acid, orthochloro-, 210.

Phenylhydrazines, chlorinated, 209.
Phenylisoxazolone, 1005.
Phenyl-*ald*-metanitrophenylnaphthotriazine, *az*-, 700.
—— —— metanitro-, 693.
Phenylmethylfurfurancarboxylic acid of Paal, relationship to phenuvic acid, 190.
Phenyl-*ald*-methylnaphthotriazine, *az*-paranitro-, 697.
—— —— reduction of, 712.
Phenylmethylpyrazolone, action of sulphur dichloride on, 334.
—— thio-, 332.
—— - —— properties of, 335.
Phenylmethylpyrazoloneazobenzene, 336.
Phenyl-*ald*-paranitrophenylnaphthotriazine, *az*-, 699.
—— —— paranitro-, 694.
Phenyl-*ald*-phenylnaphthotriazine, *az*-, metanitro-, 684.
—— —— reduction of, 704.
—— orthonitro-, 683.
—— —— reduction of, 702.
—— parabromo- and chloro-, 690.
—— paranitro-, 685.
—— —— reduction of, 702.
—— parasulpho-, 687.
Phenylpropylcarbinol, 886.
Phenylsemicarbazide, orthochloro-, 210.
Phenyltetramethylene dibromide, 891.
—— glycol, 890.
Phenylthiocarbimide, action of acetic acid on, 327.
—— action of benzaldehyde on, 67.
—— action of benzoic acid on, 67.
—— action of water on, 328.
—— interaction of, with acetic acid, 544.
—— interaction of, with propionic acid, 550.
—— preparation of, 398.
Phenylthiosemicarbazide, orthochlorophenyl, 210.
Phenylurazole, parachloro-, 212.
Phosphates, magnetic rotation of, PROC., **1890**, 144.
Phosphodichloromuconic acid, 27.
Phosphodichloromuconyl chloride, 31.
Phosphoric anhydride, action of phosphoryl chloride on, 202.
Phosphorous diamide, 1027.
—— anhydride, action of sulphuric anhydride on, 230.
—— oxide, 1019.
—— —— action of ammonia on, 1026.
—— —— action of bromine on, 1020.
—— —— action of hydrogen chloride on, 1022.
—— —— action of iodine on, 1021.
—— —— action of light on, 1019.
Phosphorous oxide, action of nitric peroxide on, 1028.
—— —— action of phosphorus trichloride on, 1029.
—— —— action of phosphorus pentachloride on, 1028.
—— —— action of selenium on, 1026.
—— —— action of sulphur on, 1022.
—— —— action of sulphur chloride on, 1026.
—— —— action of sulphuric acid on, 1026.
Phosphorus, a new modification of, PROC., **1891**, 3.
—— action of, on sulphuric anhydride, 231.
—— oxides, compounds of, with sulphuric anhydride, 230.
—— sulphoxide, 1023.
Phosphoryl chloride, action of, on phosphoric anhydride, 202.
Picric chloride, action of, on amines in presence of alkali, 714.
Picroaconitine, 272.
Picroseptdecylamine, 715.
Pimelic acid, preparation of, 825.
—— —— synthesis of homologues of, 818.
Pinus khasyana, turpentine oil from, 311.
Piperidine, action of picric chloride on, 716.
Piperonyl, some derivatives of, 150.
Piperonylacrylic acid, 152.
—— —— action of nitric acid on, 153.
—— —— amido-, 158.
—— —— nitro-, 153.
—— —— —— from nitropiperonal, 157.
—— —— —— salts of, 154.
—— —— tetrabromo-, 160.
—— —— —— action of potassium hydroxide on, 160.
—— —— α- and β-tribromo-, 163.
Piperonylethylene, tribromo-, 161.
Piperonyloïn, 164.
Platinum, action of chlorine and carbonic oxide on, 598.
—— action of nitrosyl chloride on, 663.
—— dibromide, action of carbonic oxide on, 603.
Platinum-compounds, volatile, 598.
Pneumococcus of Friedländer, fermentation induced by, 253.
Potassium persulphate, 772.
—— salts, magnetic rotation of, PROC., **1890**, 142.
—— —— molecular refraction and dispersion of, in solution, 595, 596.
Propane, nitro-, primary, action of alkalis on, 431.
Propionitrile, molecular refraction and dispersion of, 296.

Propylamine, molecular refraction and dispersion of, 296.
Propylparatoluidine, 35.
—— normal and iso-, 33.
Propylparatolylnitrosamine, 35.
Proteïd from gedda gum, 1061.

Q.

Quinindole-α-carboxylic acid, ortho-, 758.
Quinine, mucate, 754.
Quinolinehydrazine, ortho-, 756.
Quinolinesemicarbazide, ortho-, 758.

R.

Refraction, molecular, of various carbon compounds, 290.
—— —— of various substances in solution, 589.
Refractive power of organic compounds at different temperatures, PROC., **1891**, 115.
Rotatory power of turpentine, change of, on keeping, 726.

S.

Safrole, molecular refraction and dispersion of, 295.
Salts, formation of, PROC., **1891**, 118.
—— in solution, osmotic pressure of, 344.
—— magnetic rotation of solutions of, PROC., **1890**, 143.
Selenic acid, molecular refraction and dispersion of, in solution, 593.
Selenious acid, molecular refraction and dispersion of, in solution, 593.
Silicon tetrabromide, molecular refraction and dispersion of, 299.
—— tetrachloride, molecular refraction and dispersion of, 299.
Silver, action of nitrosyl chloride on, 659.
—— and lead oxides, compounds of, 1093.
—— chloride, action of light on, 536.
—— —— action of, on water when exposed to light, 537.
—— —— darkened, examination of, for oxygen, 543.
—— —— decomposition of, by light, 536.
—— salts, molecular refraction and dispersion of, in solution, 596.
Sobrerol, 313, 315.
—— inactive, 318.
—— preparation of, 315.
Sobrerone, 314.
Sodium acetate, magnetic rotatory power of solutions of, 987.
—— butyrate, magnetic rotatory power of solutions of, 988.
—— formate, magnetic rotatory power of solutions of, 986.
—— propionate, magnetic rotatory power of solutions of, 987.
—— salts, magnetic rotation of, PROC., **1890**, 140.
—— —— molecular refraction and dispersion of, in solution, 596.
Soil, nitrification in, with ammoniacal solutions, 485.
Solution, osmotic pressure of salts in, 344.
—— the dissociation hypothesis of Arrhenius, PROC., **1891**, 105.
Solutions, magnetic rotation of, PROC., **1890**, 141.
—— nature of, PROC., **1891**, 105.
Specific rotatory power of aconitine, 281.
—— volumes of liquids and their saturated vapours, new method of determining, 37.
Spectra of blue and yellow chlorophyll, 106.
Stannic chloride, vapour pressures and molecular volumes of, 911.
—— ethide, molecular refraction and dispersion of, 296.
Strychnine mucate, 754.
Substitution-derivatives, formation of, PROC., **1891**, 62.
Sugar, cane-, and milk-, molecular refraction and dispersion of, in solution, 591.
—— —— estimation of, 46.
Sulphanilic acid, action of picric chloride on, 717.
Sulphates, magnetic rotation of, PROC., **1890**, 143.
Sulphuric acid solutions, properties of, PROC., **1891**, 105.
Sulphuric anhydride, action of phosphorus on, 231.
—— —— compounds of oxides of phosphorus with, 230.
Sulphuryl chloride, function of the chlorine in, PROC., **1891**, 60.

T.

Tellurium, volumetric estimation of, 58, 238.

Terebenthene hydrochlorides, 728.
—— oxidation of, in sunlight, 311, 315.
Terpene hydrate, molecular refraction and dispersion of, in solution, 591.
Terpenes, 311, 648, 725.
—— and allied compounds, 311.
Terpilene dihydrochloride, molecular refraction and dispersion of, in solution, 591.
Tetragalactangeddic acid, 1069.
Tetrahydrophenylmethylfurfuran, properties of, 194.
Tetraphenylcrotolactone, action of alcoholic ammonia on, 144.
—— action of methylamine on. 147.
Tetraphenylpyrrholone, reduction of, 145.
Tetrarabinantrigalactangeddic acid, 1035.
Tetrathiocarbamidammonium bromide, 384.
—— chloride, 386.
—— iodide, 385.
Tetrethylammonium bromide and iodide, compounds of, with thiocarbamide, 387.
Thallium, action of nitrosyl chloride on, 657.
Thiocarbamide and methyl- and ethyl-ammonium salts, 391.
—— benzyl derivatives of, 551.
—— compound of triethylammonium bromide with, 390.
—— compound of, with diethylammonium bromide, 389.
—— compounds of, with ammonium haloïd salts, 384.
—— compounds of, with tetrethylammonium bromide and iodide, 387.
—— constitution of, 394.
—— new additive compounds of, 383.
Thiocarbamides, aromatic, preparation of, 196.
—— substituted, action of acetic anhydride on, 396.
—— substituted, and ammonium bromide, 386.
Tin, action of nitrosyl chloride on, 661.
—— gold, and cadmium, freezing point of triple alloys of, 936.
Titanium tetrachloride, molecular refraction and dispersion of, 299.
Toluene, orthochloro-orthonitro-, 1017.
Toluidine, ortho-, ortho- and para-nitro-derivatives of, 1013.
—— orthonitro-ortho-, reduction of, in alkaline solution, 1015.
—— paranitro-ortho-, reduction of, in alkaline solution, 1015.
Toluidines, nitro-ortho-, displacement of the amido-group in, by chlorine, 1017.
Toluidines, ortho-, para- and ortho-nitro-, reduction of, in acid solution, 1016.
Tolylmethylpyrazoloneketoparatolylhydrazone, para-, 340.
Tolylthiocarbamide, para-, action of acetic anhydride on, 403.
Tolylthiocarbimide, meta-, preparation of, 403.
—— ortho-, preparation of, 402.
—— para-, preparation of, 404.
Triacetic acid, δ-lactone of, 607.
—— —— —— action of bromine on, 612.
—— —— —— reactions of, 614.
Triarabinantetragalactangeddic acid, 1071.
Triarabinantrigalactangeddic acid, 1037.
Triazine-derivatives, nomenclature of, 679.
Triazines, nitro-, reduction of, 701.
—— substituted, preparation of, 679.
Triazine-series, 678.
Triethylamine, molecular refraction and dispersion of, 295.
Triethylammonium bromide, compound of thiocarbamide with, 390.
Triethylisoxazole, 432.
Trigalactangeddic acid, 1043.
Trimethylene cyanide, molecular refraction and dispersion of, 295.
—— iodide, molecular refraction and dispersion of, 295.
Trimethylisoxazole, 413, 429.
Tripropylamine, molecular refraction and dispersion of, 296.
Turpentine, 725.
—— action of hydrogen chloride on, 728.
—— hydrochloride, conversion of, into camphene hydrochloride, 730.
—— increase of rotatory power of, on keeping, 726.
—— oil of, oxidation of, in sunlight, 311, 315.
—— oils, 311.

V.

Vapour pressures of acetic acid, 903.
—— —— of carbon tetrachloride and stannic chloride, 911.
—— —— of dibenzyl ketone, 626.
—— —— of mercury, 629.
Vapours, saturated, new method of determining the specific volumes of, 37.

W.

Water, potable, estimation of nitrates in, 320.

X.

Xylenes, molecular refraction and dispersion of, 295.
Xylylthiocarbimide, meta-, preparation of, 405.

Z.

Zinc, action of nitrosyl chloride on, 656.
—— ethyl, molecular refraction and dispersion of, 296.

ERRATA.

VOL. LIX (Trans., 1891).

Page	Line	
51	15	from bottom *et seq.*, *for* "In the paper . . . on the subject," *read* "In this paper, Dunstan and Dymond discuss my own experiments on the subject, the account of which was published in abstract only (*Proc. Chem. Soc.*, 1889, 134)."
318		Figures 2 and 3 on this page are placed upside down, so that the obtuse axial angle is at the lower part of the crystal instead of the upper part, as stated in the context.
426	10	from top, *for* "  " *read* "  ."
533	9	,, ,, *for* "through *y*" *read* "through *g*."
533	3	,, bottom, *for* "0·2922" *read* "0·2992."
534	5	,, top ,, "(ignited)..... 0·44" *read* "(ignited)..... 0·15."
680	bottom,	*for* "  " *read* "  ."
759	14	from top, *for* "  " *read* "  ."
759	17	from top, *for* "$C_{12}H_7N_2O_2$" *read* "$C_{12}H_8N_2O_2$."
